

TECHNICIAN

Port Elizabeth

RAD-X-LIN, a subsidiary of the GVI Oncology Group, provides installation and maintenance services of specialised medical equipment.

We are looking for a highly motivated Electronics Technician to work on the service and installation of sophisticated Medical Equipment. The applicant should have excellent diagnostic skills in both Analogue and Digital circuitry and **MUST** be able to fault find down to component level. Experience of working with High Voltage or Pulse Modulators is also a requirement. A high level of computer skills is advantageous, but not essential.

The applicant will be expected to be flexible in his / her approach to the job and travel will be necessary from time to time. The Remuneration package offered will be based on the applicants experience.

To start: As Soon As Possible
Closing date for applications: 15 July 2005
