

Hospital Service Engineers required (Feb 2007)

Siemed services is currently in the market to employ Service Engineers to perform preventative maintenance, services, installations and repairs of all equipment in the Clinical Engineering Hospital Environment (Includes all Hospital Medical Equipment / Biomedical and life support & emergency rescue equipment as well as all associated accessories and Medical Furniture).

All applicants will be evaluated on qualification and technical merit. Interviews will be conducted with applicants as they are received (At Siemed's discretion) and to the time positions are filled. Persons are encouraged to submit CV's for record purposes for future possible position placements.

Requirements:

- National Higher Diploma in Electrical Engineering (light current) or Biomedical Technicians diploma
- Experience: 4 years relevant experience in the medical service industry on the mentioned equipment types.
- Valid Drivers License.
- Familiarity with the Occupational Health and Safety Act regulations advantageous
- Good verbal written and communication skills
- Ability and willingness to be on stand-by in a call-out system
- Computer literacy
- Other requirements will be detailed on application.

Activity

- Corrective and Preventative maintenance of Hospital Medical Equipment.
- To perform safety modifications and upgrades in co ordination with suppliers.
- Maintain close liaison with customers and monitor complaints.
- To adhere to the Siemed Project Agreement Requirements regarding Service Delivery to IALCH regarding Clinical and Medical Equipment
- To ensure that all administration tasks are carried out accurately and in a timely manner.
- To ensure efficient material and spare parts management (including returns).
- To ensure that all tools and test equipment issued to the employee are properly maintained, calibrated and all the company assets issued are kept safe and secure at all times.
- To participate in training courses including self study, computer based courses and on the job training.
