

Customer Service Engineers

We are currently looking for Customer Service Engineers to perform preventative maintenance services, installations, repairs and remote diagnostics on various Siemens medical equipment (CT, MRI, Molecular Imaging, AX, SP, Therapy).

Requirements: National Higher Diploma in Electrical Engineering (light Current).

Experience: 2 years relevant experience in the medical service industry.

You will be required to:

- To carry out service and maintenance of all Siemens Medical Solutions products within the product range.
- To supervise and perform installations of all Siemens Medical Solutions products within the product range.
- Perform project management of all Siemens Medical Solution products as and when required.
- To perform safety modifications and upgrades in co ordination with the USC.
- Maintain close liaison with customers and monitor complaints.
- To ensure good communication with the USC , ensuring that current location and status is known.
- To ensure service escalation procedures are complied with.
- To ensure that all administration tasks are carried out accurately and in a timely manner.
- To ensure efficient material and spare parts management (including returns).
- To ensure that all tools and test equipment issued to the employee are properly maintained, calibrated and all the company assets issued are kept safe and secure at all times.
- To participate in training courses including self study, computer based courses and on the job training.
- Attend the RSC support centre as and when required.

Closing Date: 19 September 2006
